

Advantage Manufacturing Technologies

Integrity in Every Part

TRUST

“Trust is essential to our business and the relationships we build.

When you choose Advantage Manufacturing Technologies as an outsourcing partner, we respect and value the responsibility we are accepting. For in the manufacture of medical components that will touch and enhance a human life, THERE CAN BE NO QUESTION OF QUALITY.

That’s why from prototyping to production runs, you’ll find integrity in every part—in each finished component or assembly we manufacture and in every phase of our relationship with you. As your silent partner, you can trust AMT to support your success by delivering on our promise with products that are on time and in spec, time after time.”

Single Source Solutions

Advantage Manufacturing Technologies is a contract manufacturer of precision-machined surgical implants, instruments and trays for OEMs in the orthopedic industry.

Leading medical device manufacturers rely on AMT for providing single source solutions to their outsourcing needs. They know they can entrust their name and reputation to the ongoing quality, reliability and deliverability of our work at a cost significantly below our competitors.

Our problem solving expertise and value added approach to manufacturing allow us to efficiently take your project from design and development through production, packaging and delivery.

The result: you’ll get to market faster and more cost-effectively while simplifying your supply chain. By partnering with AMT for your production needs, you will free up your capital and can stay focused on your core competencies.

QUALITY

Our mission is to empower customers with competitive advantages through value driven medical manufacturing solutions that enhance human life.

ADVANTAGE

Our Strengths Give You the Advantage

As our name implies, Advantage Manufacturing Technologies offers the technical resources and expertise that will give your company the competitive advantage. Here's how:

Development Support—We help you get to market first and stay there. Our technical department will collaborate with you on developing a prototype or making design and process improvements that will optimize manufacturability and reduce costs.

Project Management—Your job is always under control at AMT. Our state-of-the-art software and managerial expertise allow us to control and track every phase of production from concept to finished and packaged part. If you have questions about your project, we know the answers.

Quality Assurance—We pride ourselves on the close tolerances and quality finishes we achieve in every part that passes through our hands. AMT is FDA-compliant and meets certification requirements for ISO 13485:2003 and ISO 9001:2000.

Innovative Technologies—AMT's skilled team leverages advanced machining and process technologies to meet your time-sensitive manufacturing and delivery needs. Our new state-of-the-art facility will provide enhanced resources and double our capacity.

Team AMT Support—If it's important to you, it's important to us. Our responsive corporate structure enables us to deliver value added services that are adjusted to your unique and changing needs.

Trusted Relationships—We strive to maintain a corporate culture where every employee and customer is valued, respected and trusted. In your relationship with

AMT, you will receive superior service from friendly, knowledgeable people who truly enjoy their work and value your business.

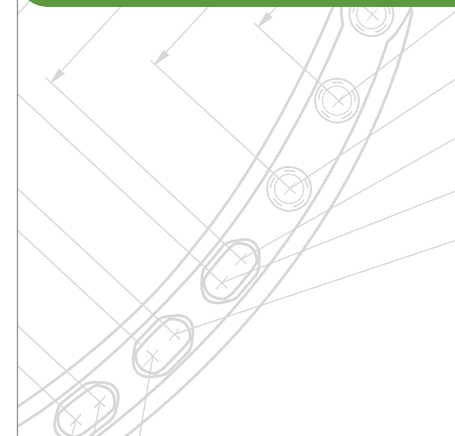

We Deliver it Complete

Reduce costs, increase capacity and get to market faster with AMT's turnkey manufacturing solutions.

Our comprehensive services seamlessly take your project from concept to completed part—finished, as specified, and delivered from AMT's dock to your stock.

Choose AMT as your complete solution for:

- Manufacturing Engineering
- Production
- Finishing
- Cleaning/Passivating
- Laser Marking
- Assembly/Kitting
- Packaging
- Delivery

How Can AMT Serve You?

Looking to bring an idea to market ahead of the competition? Want to improve the quality and deliverability of your product line while keeping costs in check?

Let us prove what Advantage Manufacturing Technologies can do for you.

As your silent partner, we will commit the full resources of our company to providing the trusted results you need to succeed in the medical device market.

Call us today at 425.485.3980 to consult on your next project.
